

SITE MANAGER

CINEMASSIVE

Site Manager

Essential for optimizing redundancy, performance, and security.

When it comes to effectively managing today's mission-critical environments, multi-room scenarios, and complex video wall systems, your organization needs Site Manager. Integrated with the CineNet Platform, Site Manager provides overarching control of the devices in a Cinemassive video wall system.

SITE MANAGER

The CineNet Platform is designed to give you complete control over your video wall system, content, and environment. With Site Manager as part of your video wall system architecture, your organization also gains the reassurance of optimized resiliency, performance, and security.

CINENET **3**
PLATFORM

OPTIMIZED REDUNDANCY

- Add an extra layer of redundancy if your Alpha FX processor becomes unavailable.
- Enable display mirroring – hot/hot backup redundancy of capturing and displaying content.

OPTIMIZED PERFORMANCE

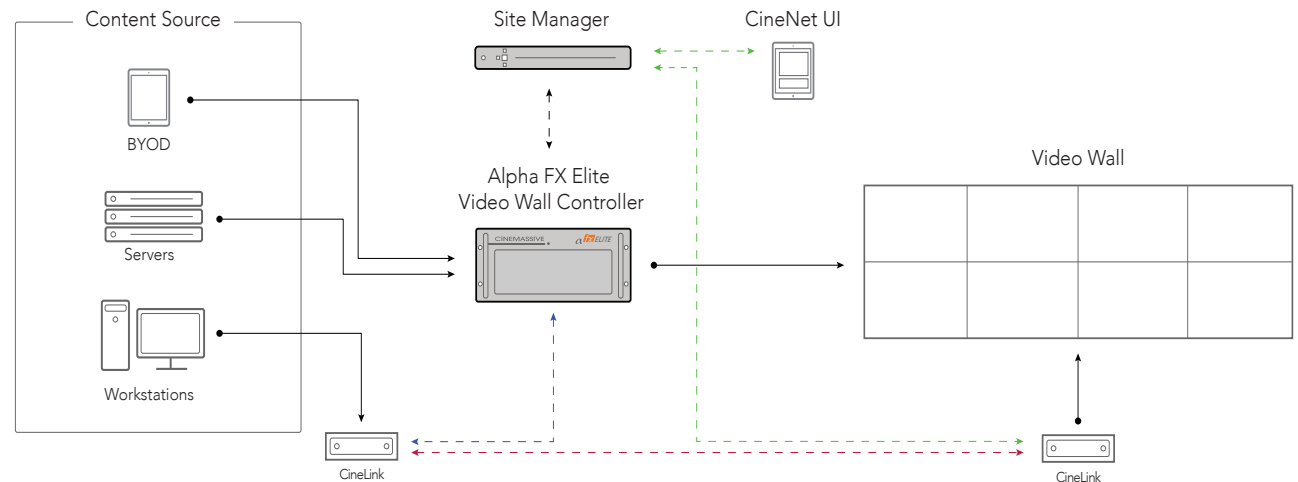

- Scale to large video wall systems.
- Expand the number of web applications that can be streamed on your video display wall.
- Ensure an unmatched control room experience.

OPTIMIZED SECURITY

- Add a secure gateway and protect your system from the latest threats.
